

INNOVATE YOUR FUTURE

INNOVATIVE[®]
AUTOMATION. LEAD GLOBALLY.

SR. .NET/C# SOFTWARE DEVELOPER

Innovative Automation has a unique company culture where every member of the team is empowered, and all new ideas are welcome. We place a high value on fostering an environment of respect and trust between all team members. Innovative Automation listens to, invests in and supports employees, offering advanced skills training, and opportunities for advancement.

POSITION OVERVIEW

Reports to: IT Group Leader

Innovative Automation is looking for Senior .NET/C# Software Developer to join their team of Innovators. In this position, you will support the safe and timely completion of departmental deliverables. This position will work with the IT Group Leader and Software Development group to create, integrate and support software changes in internal business processes.

The ideal candidate has a love of learning, as every single day presents exciting new challenges. You will quickly become a core part of the Innovative team and an active decision maker helping to guide our output.

KEY RESPONSIBILITIES

- Research, design, write, develop and maintain C# code in a dynamic source-controlled environment
- Develop clean, easy to understand well documented code.
- Integrate applications with backend SQL databases and develop reports in Microsoft Reporting Services or SAP Crystal Reports.
- Demonstrate resourcefulness and independent thinking.
- Work closely with other staff to provide training.
- Strong communication skills with the ability to actively listen to ideas and concerns of others.
- Display a high attention to detail.
- Ability to research.
- Ensure adherence to ISO policies and procedures.
- Ensure the SQPD (Safety, Quality, Performance and Delivery) of all jobs.
- Occasional travel as required, globally.
- Ability to lead a team towards a common goal.
- Work cooperatively with customers, fellow employees, contractors, and management.
- Develop relationships with prospective external stakeholders while maintaining a positive relationship with existing external stakeholders.

KEY TECHNICAL SKILLS AND KNOWLEDGE

- Computer and MS Office Software (Word, Excel, Powerpoint).
- Proficient in SQL (Microsoft/MySQL) database design and programming.
- Proficient in Microsoft Visual Studio C# development of forms and ASP.net applications.

QUALIFICATIONS

- Minimum Diploma in Computer Engineering/Software Engineering (University) or Computer Programmer/Software Engineering Technician (College).
- Minimum 5 Years' of relevant experience.
- Changing job conditions may require periodical skill upgrades.

JOB FIT

- Confidence in dealing with people.
- Ability to deal with all types of personalities.
- Adaptable and able to modify approach in dynamic environment.
- Able to prioritize competing job functions.
- Possess structured problem solving and analytical skills.

HOW TO APPLY

Innovative Automation is always looking for talented people, so even if you don't currently see a job that fits your skill set, please forward us your resume if you feel you would like to become part of our team. All resumes will be evaluated and kept on file.

We thank all applicants but advise that only those to be considered for an interview will be contacted.

Innovative Automation welcomes and encourages applications from people with disabilities. Accommodations are available on request for candidates taking part in all aspects of the selection process.
